

# How much energy is your facility losing?

**Insufficient and poorly installed insulation around heating and cooling systems is, by far, the biggest cause of lost energy – and dollars.**

Proper insulation saves energy, saves money and it saves the environment through reductions in greenhouse gas emissions. No group of professionals understands this more than the International Association of Heat and Frost Insulators/Local 17 and their partner contractors.

Local 17 can help you assess how much energy your facility is currently losing. For more information about an insulation audit, visit [www.Local17Insulators.com](http://www.Local17Insulators.com) or call 773.247.8184
